

# What You Need to Know About 'the Great Reset'

Analysis by [Dr. Joseph Mercola](#) ✓ Fact Checked

## STORY AT-A-GLANCE

- › “The Great Reset” is a new “social contract” that ties you to it through an electronic ID linked to your bank account and health records, and a “social credit” ID that will dictate every facet of your life
- › While the COVID-19 pandemic is being used as a justification for the Great Reset movement, the agenda has nothing to do with health and everything to do with a long-term plan to monitor and control the world through digital surveillance and artificial intelligence
- › The Great Reset and the Fourth Industrial Revolution are rebranded terms for technocracy and the old “New World Order” melded with the transhumanist movement
- › Technocracy is an economic system of resource allocation that revolves around technology – in particular artificial intelligence, digital surveillance and Big Data collection – and the digitization of industry and government, which in turn allows for the automation of social engineering and social rule, thereby doing away with the need for democratically elected leadership
- › While the real plan is to usher in a tech-driven dystopia free of democratic controls, they speak of this plan as a way to bring us back into harmony with nature

By now, you’ve probably started hearing world leaders speak of “the Great Reset,”<sup>1</sup> “the Fourth Industrial Revolution”<sup>2</sup> and the call to “Build Back Better.”<sup>3</sup> One example among many is this speech by Matt Hancock, British Minister for Digital, Culture, Media & Sport, given during an All-Party Parliamentary Group meeting on the Fourth Industrial Revolution in 2017:<sup>4</sup>

*“One of the roles of Parliament is to cast ahead ... and tackle the great challenges of our time ... The nature of the technologies is materially different to what has come before. In the past, we’ve thought of consumption as a one-off, and capital investment as additive.*

*Yet put resources into the networks that now connect half the world, or into AI, and the effects are exponential ... I’m delighted to speak alongside so many impressive colleagues who really understand this, and alongside Professor Klaus Schwab who literally ‘wrote the book’ on the 4th Industrial Revolution.*

*Your work, bringing together as you do all the best minds on the planet, has informed what we are doing ... Our Digital Strategy, embedded within the wider Industrial Strategy, sets out the seven pillars on which we can build our success.*

*And inside that fits our 5G strategy, like a set of Russian Dolls. Our Strategy covers infrastructure, skills, rules and ethics of big data use, cyber security, supporting the tech sector, the digitization of industry, and digitization of government.”*

## **What Is the Great Reset?**

But what do the terms “Great Reset,” “Fourth Industrial Revolution” and “Build Back Better” actually mean? What do they refer to? In the October 16, 2020, Corbett Report<sup>5</sup> above, journalist James Corbett breaks down the new social contract planned for the world, otherwise known as “the great reset.”

**“ The Great Reset not only ties you to it through an electronic ID linked to your bank account and health records, but even gives you a “social credit” ID that can run every facet of your life.”**

While the current pandemic is being used as a justification for the movement, the agenda has nothing to do with health and everything to do with a long-term plan to monitor and control the world through technical surveillance. In other words, the world will be reset to depend on digital technocracy run by self-appointed elitists.

It's a power grab of unprecedented magnitude, and involves the restructuring of social classes to dismantle democracy, erase national borders and allow for the governing of communities from a distance by a group of unelected leaders. What was in the past referred to as the "new world order" is now known as "the Great Reset."

This Great Reset not only ties you to it through an electronic ID linked to your bank account and health records, but even gives you a "social credit" ID that can run every facet of your life. This isn't a lofty conspiracy theory – it's real. It's happening now. And you need to know how to fight it before it's too late.

Ultimately, it's a technocratic agenda that seeks to integrate mankind into a technological surveillance apparatus overseen by powerful artificial intelligence. Ironically, while the real plan is to usher in a tech-driven dystopia free of democratic controls, they speak of this plan as a way to bring us back into harmony with Nature.

If you're unfamiliar with the term "technocracy," be sure to go back and listen to [my interview with Patrick Wood](#), author of "Technocracy Rising: The Trojan Horse of Global Transformation" and "Technocracy: The Hard Road to World Order." You can also learn more on Wood's website, [Technocracy.news](#).

In a nutshell, technocracy is an economic system of resource allocation that revolves around technology – in particular artificial intelligence, digital surveillance and Big Data collection – and the digitization of industry (which includes banking) and government, which in turn allows for the automation of social engineering and social rule, thereby doing away with the need for elected government leaders.

## Your Guide to the Great Reset

According to the World Economic Forum,<sup>6</sup> the Great Reset “will address the need for a more fair, sustainable and resilient future, and a new social contract centered on human dignity, social justice and where societal progress does not fall behind economic development.”

And what is the World Economic Forum? It’s an international organization for public-private cooperation that “engages the foremost political, business, cultural and other leaders of society to shape global, regional and industry agendas.”<sup>7</sup>

The founder and executive chairman of the World Economic Forum is professor Klaus Schwab, who, as mentioned by Hancock in his 2017 speech, wrote the book on the Fourth Industrial Revolution. Schwab announced the World Economic Forum’s Great Reset Initiative in June 2020. In his report, Corbett summarizes the Great Reset thus:

*“At base, the Great Reset is nothing more, and nothing less, than a great propaganda, marketing rollout campaign for a new brand that the would-be global elite are trying to shove down the public’s throats ... It’s just a fresh coat of lipstick on a very old pig. This is The New World Order, just redefined. It’s just a new label for it.”*

And, as explained by Corbett, for those who forgot about what the **New World Order** was/is all about, it was all about “centralization of control into fewer hands, globalization [and] transformation of society through Orwellian surveillance technologies.”

In other words, it’s technocracy, where we the people know nothing about the ruling elite while every aspect of our lives is surveilled, tracked and manipulated for their gain. Four key take-aways from Corbett’s research into the Great Reset are:

- 1. The Great Reset has NOTHING to do with a virus, the COVID-19 pandemic or anything else related to public health.**
- 2. The Great Reset is a coordinated agenda that has been years in the making – The pandemic is simply being used as a convenient “cover” for an elitist, globalist agenda that has been planned for decades.**

**3. The Great Reset is NOT the end of globalization** – On the contrary, it is globalization turbo-charged. As noted by Schwab in the policy book, “COVID-19: The Great Reset,” co-written with Thierry Malleret and cited in Corbett’s report:

*“If no one power can enforce order, our world will suffer from a ‘global order deficit.’ Unless individual nations and international organizations succeed in finding solutions to better collaborate at the global level, we risk entering an ‘age of entropy’ in which retrenchment, fragmentation, anger and parochialism will increasingly define our global landscape, making it less intelligible and more disorderly.”*

In other words, there’s no room for the spontaneously arising social order that occurs when people are allowed to freely interact. Instead, there must be “one power” to enforce whatever the desired social-environmental-economic-geopolitical order is.

**4. This process is not meant to end** – The end of the pandemic will not be the end of this totalitarian, digital enslavement agenda. The plan is not to “reset” the world back to some earlier state that will allow us all to start over with a cleaner environment and more equitable social structures. The plan is to circumvent democracy and shift global governance into the hands of the few. As noted by Schwab in “COVID-19: The Great Reset”:

*“When confronted with it, some industry leaders and senior executives may be tempted to equate reset with restart, hoping to go back to the old normal and restore what worked in the past: traditions, tested procedures and familiar ways of doing things – in short, a return to business as usual.*

*This won’t happen because it can’t happen. For the most part, ‘business as usual’ died from (or at the very least was infected by) COVID-19.”*

## **COVID-19 Transformation Map**

What might the Great Reset transformation look like? As noted by Corbett, the following illustration, created and released by the World Economic Forum, shows the impact of the COVID-19 pandemic on various aspects of life, and how pandemic responses are transforming these areas.

If you go to the [original site for the illustration](#),<sup>8</sup> you'll also find listings of publications, videos and data relating to all of these facets. Around the 25-minute mark, Corbett explains how you can use this map to get a feel for the scope of the transformation being prepared – everything from finance, business and education to health care, human rights and global governance.

Importantly, the pandemic is being used to destroy the local economies around the world, which will then allow the World Economic Forum to come in and “rescue” debt-ridden countries.

However, the price for this salvation is your personal freedom and liberty. The World Economic Forum and the central banks will, through their facilitated financial bailouts, be able to effectively control most countries in the world. And, again, one of the aspects of the technocratic plan is to eliminate nation borders and nationalism in general.

## The Fourth Industrial Revolution

A related term to the Great Reset is “the Fourth Industrial Revolution.” This refers to the merging of digital, physical and biological systems. As noted by Schwab, “It doesn't change what we are doing, but it changes us.”<sup>9</sup>

What they're talking about is the creation of a new economic system built around the merger of the human body and mind with machines and artificial intelligence. In other words, technocracy – a resource-based economic system with centralized control by a technocratic elite who have the know-how to program the computer systems will ultimately dictate the lives of everyone.

Of course, it's sold to us as a means to harness and elevate human potential, when in fact it will do the complete opposite. Ultimately, they're not just trying to change the

definition of what it means to be human – they're openly conspiring to alter humanity through technological means.

In addition to the sources cited earlier, Corbett also fleshed out the history of technocracy in his December 28, 2015, report,<sup>10</sup> "How Big Oil Conquered the World." In short, the Fourth Industrial Revolution is nothing but a rebranding of technocracy, melded with the [transhumanist movement](#).

You can also learn more about Schwab, the figurehead of modern technocracy, by reading the June 29, 2020, Technocracy.news article<sup>11</sup> "The Elite Technocrats Behind the Global 'Great Reset,'" and the October 12, 2020, Off-Guardian article,<sup>12</sup> "Klaus Schwab & His Great Fascist Reset."

According to Off-Guardian,<sup>13</sup> Schwab ensures us that "smart" Big Data technologies will "deliver new and innovative ways to service citizens and customers' and we will have to stop objecting to businesses profiting from harnessing and selling information about every aspect of our personal lives."

In that article, Schwab is also quoted as saying, "Establishing trust in the data and algorithms used to make decisions will be vital" – which about sums up the technocratic view of "government."

## **Coronavirus 'Circuit Breaker'**

In some parts of the world, a second wave of COVID-19 is reportedly<sup>14</sup> emerging, and according to some researchers, the best way to combat it is to implement another round of more stringent lockdown measures – a so-called "circuit breaker" strategy to bring the infection rate under control.

Meanwhile, other reports<sup>15</sup> warn that while COVID-19 can be deadly for a small minority of people, so are lockdowns, thanks to the poverty, famine and mental health challenges they bring about.

## **Lockdowns Are a Failed Experiment**

According to an October 13, 2020, article<sup>16</sup> in The Sun, COVID-19 restrictions “could hurl 90 million into ‘extreme poverty,’” with the poorest nations bearing the brunt of the economic collapse. The New York Post also recently reported<sup>17</sup> that “COVID-19 lockdowns were a risky experiment” that failed, and have proven deadlier than the virus itself.

*“No ethical scientist would conduct such a risky experiment without carefully considering the dangers and monitoring the results, which have turned out to be dismal,” the New York Post writes.*<sup>18</sup>

*“While the economic and social harms have been enormous, it isn’t clear that the lockdowns have brought significant health benefits beyond what was achieved by people’s voluntary social distancing and other actions.*

*In a comparison of 50 countries, a team led by Rabail Chaudhry of the University of Toronto found that COVID-19 was deadlier in places with older populations and higher rates of obesity (like the United States), but the mortality rate was no lower in countries that closed their borders or enforced full lockdowns.*

*After analyzing 23 countries and 25 U.S. states with widely varying policies, Andrew Atkeson of UCLA and fellow economists found that the mortality trend was similar everywhere once the disease took hold: The number of daily deaths rose rapidly for 20 to 30 days, then fell rapidly ...*

*The cost-benefit rationale becomes even bleaker if you use the standard metric for determining whether a drug or other intervention is worthwhile: How much money will society spend for each year of life being saved?*

*By that metric, the lockdowns must be the most cost-ineffective intervention in the history of public health, because so many of the intended beneficiaries are near the end of life. In America, nearly 80 percent of COVID-19 victims have been over 65, and more than 40 percent were living in nursing homes, where the median life expectancy after admission is just five months ...*

*No one wants to hasten the demise of the elderly, but they and other vulnerable people can be shielded without shutting down the rest of the society, as Sweden and other countries have demonstrated ...*

*Early in the pandemic, Scott Atlas at the Hoover Institution and researchers at Swansea University independently calculated that the lockdowns would ultimately cost more years of life than COVID-19 in the United States and Britain, and the toll seems certain to be worse in poor countries.*

*The World Bank estimates that the coronavirus recession could push 60 million people into extreme poverty, which inevitably means more disease and death."*

## **The Cure That Is Worse Than the Disease**

We're now also seeing reports<sup>19</sup> that "unexplained excess deaths at home" are outpacing COVID-19 deaths by nearly 900%, likely due to people with chronic illnesses avoiding medical care. Unfortunately, physicians and scientists continue to butt heads when it comes to the sanest path forward.

As noted in an October 6, 2020, article<sup>20</sup> in The Conversation, whether or not the coronavirus cure is worse than the disease has become "the most divisive question of 2020," with dozens of doctors signing on to one side or the other.

A recent Kaiser Health News story<sup>21</sup> also highlights the impact of "pandemic stress" on public health, as more and more people are reporting problems ranging from insomnia and excruciating headaches to hair loss and cracked teeth:

*"Throughout the pandemic, people who never had the coronavirus have been reporting a host of seemingly unrelated symptoms: excruciating headaches, episodes of hair loss, upset stomach for weeks on end, sudden outbreaks of shingles and flare-ups of autoimmune disorders.*

*The disparate symptoms, often in otherwise healthy individuals, have puzzled doctors and patients alike, sometimes resulting in a series of visits to*

*specialists with few answers. But it turns out there's a common thread among many of these conditions, one that has been months in the making: chronic stress.*

*Although people often underestimate the influence of the mind on the body, a growing catalog of research shows that high levels of stress over an extended time can drastically alter physical function and affect nearly every organ system.*

*Now, at least eight months into the pandemic, alongside a divisive election cycle and racial unrest, those effects are showing up in a variety of symptoms. 'The mental health component of COVID is starting to come like a tsunami,' said Dr. Jennifer Love, a California-based psychiatrist."*

## **The Coronavirus Fraud**

As detailed in "[Coronavirus Fraud Scandal – The Biggest Fight Has Just Begun](#)," an international network of legal experts and health professionals are preparing to launch the largest class-action lawsuit in history, against all those responsible for the global lockdowns, from local policy makers to the World Health Organization and everyone in between.

According to the four attorneys who founded the German Corona Extra-Parliamentary Inquiry Committee, which is leading the tort case, the COVID-19 pandemic is "probably the greatest crime against humanity ever committed." Pandemic measures were intended to sow panic in order to allow for a massive transfer of wealth, and fraudulent testing has been used to keep the ruse going.

In reality, mortality statistics reveal COVID-19 has not led to an excess of deaths above the annual norm, the proposed action says, and there's no evidence lockdowns and economic shutdowns have produced favorable results.

While the Corona Extra-Parliamentary Inquiry Committee hasn't specifically addressed the pandemic as a vehicle for a technocratic revolution, it highlights that it has been

fraudulently used as a means for wealth transfer and elimination of basic human rights.

As noted in the June 29, 2020, Technocracy.news article,<sup>22</sup> “The Elite Technocrats Behind the Global ‘Great Reset’”:<sup>23</sup>

*“The UN Agenda 2030 with its Sustainable Development Goals is claimed to ‘ensure peace and prosperity for people and the planet.’ The actions are said to tackle poverty and hunger, bring better health and education, reduce inequalities, and save the oceans, forests and the climate. Who can argue against such benevolent goals?*

*But the promised Utopia comes with a price – it sets shackles on our personal freedom ... The leading partners of the United Nations Global Goals project reveal the real technocratic agenda that lies behind the polished feel-good façade – it involves a plan to fully integrate mankind into a technological surveillance apparatus overseen by a powerful AI.*

*The current pandemic scare has been a perfect trigger to kickstart this nefarious agenda ... The current COVID-19 crisis is seen by the World Economic Forum and its chairman Klaus Schwab as the perfect trigger to implement their grandiose technocratic plan. Big Tech will come to ‘rescue’ the world ...*

*This techno-fascist recipe will then, in an utmost non-democratic fashion without any public debate or skeptic inquiry, soon be integrated into the agenda of G20 and the European Union – relabeled as the Great Green Deal ...*

*Unsurprisingly, Klaus Schwab fails to mention his own and his cronies’ role in creating this global economic mess in the first place – as it was ‘foreseen’ with stunning accuracy in World Economic Forum’s and Bill Gate’s Event 201 (October 2019) and in the Rockefeller Foundation report<sup>24</sup> Scenarios for the Future of Technology and International Development (2010).”*

As I discuss in **“The Global Takeover Is Underway,”** technocracy is inherently a technological society run through social engineering, and Big Tech censorship is part and parcel of this. In other words, the medical tyranny and censorship of anti-groupthink

that has emerged during this pandemic are an unavoidable element of the Great Reset, and if you think it's bad now, just wait until the whole system is brought fully online.

The mere idea of dissent will become a thought of the past, because your life — your health, educational and work opportunities, your finances and your very identity — will be so meshed with the automated technological infrastructure that any attempt to break free will result in you being locked out or erased from the system, leaving you with no ability to learn, work, travel or purchase anything.

It sounds far-fetched, I know, but when you follow the technocratic plan to its inevitable end, that's basically what you end up with. The warning signs are all around us, if we're willing to see them for what they actually are. The only question now is whether enough people are willing to **resist it to make a difference**.
